

GARDEN ORNAMENTS

THE ERKINS STUDIOS

THE FORMAL GARDEN depends upon Garden Furniture for many of its effects. So, too, the beauty of the informal garden can be greatly enhanced by the use of a piece or two of ornament.

This catalogue illustrates only a few of the more popular designs in our collection, which includes Italian Marble, English Lead, Bronze, Imported and Domestic Terra Cotta (both glazed and unglazed), and our Pompeian Stone—a composition which resembles grey Indiana Limestone in color, texture and durability. There are hundreds of other models in stock, and we shall be glad to send additional illustrations if you will advise us definitely regarding your requirements. We have the facilities to produce special work and will gladly furnish estimates for executing your own designs, or will submit special sketches for your approval.

A few of the special orders by ERKINS STUDIOS are illustrated on the last page of this catalogue.

VICENZA STONE FIGURES FROM ITALY

Vicenza stone is a natural stone, quarried in Italy, where these lovely figures were carved by hand. The stone has a patined finish, giving them a mellow beauty ordinarily found only in antique sculpture. The figures, which are individually carved, vary slightly in detail of drapery, flowers, etc., in each importation.

The crude pottery from the Fabriques in the vicinity of Florence has happily found its way to this country, where its soft color, ranging from deep cream to light red, has added charm to many of our gardens. The texture is rough and these designs are among the best shapes.
